

Chubb Risk Consulting

SERVICES FOR Construction Industry Clients

Chubb Risk Consulting provides a fully integrated, dedicated, and focused approach to help clients maximize control of their construction risk management program. Our goal is to provide effective solutions that can be applied to the unique characteristics of a dynamic and ever-changing construction environment. We will help you build a proactive safety culture, which helps to reduce incidents and injuries, retain workers, reduce claims and delays, and enhance productivity and profitability, while strengthening the company's reputation.

Our team consists of experienced and highly-credentialed members that are trained in the safety and insurance environment focusing on all levels risk that influence your bottom line. [Chubb Risk Consulting](#) is helping you protect your team, financial interests and reputation. We craft pragmatic solutions with our insureds and offer recommendations to help minimize loss potential for Contractor Practice programs, Projects (Wrap Ups, Project Specific & JV) and Maintenance Wraps.

Employing a network of nearly 500 global risk engineers and more than 120 risk specialists, including more than 15 dedicated construction safety experts, Chubb's risk engineers take the time to understand each company or project to align service strategies with its business needs.

On-site and virtual training is available at and from the [Chubb Risk Engineering Center](#) to deliver loss mitigation training across multiple lines of business and offers courses specifically tailored to address the unique risks faced by clients in the Construction Industry.

Additionally, clients may access the [Construction Risk Engineering Portal](#). Designed by our dedicated team of Chubb construction risk engineers – with specialized expertise in heavy civil, high-rise, hospitality and housing – our online portal includes tools and resources to address critical safety and loss control challenges clients may face.

Examples of Success Stories

General Contractor

Chubb's construction safety team provides ongoing jobsite inspections to a large general contractor. The project entails a capital improvement project for a global airline at one the nation's busiest airports. Chubb's consultant identified severe uncontrolled electrical deficiencies during their consultation. The issues were immediately pointed out to the contractor's safety manager who in turn suspended all work until the hazards were addressed. Had this work continued on, it could have potentially killed workers and closed the airport for an indefinite period of time. Instead, the insured successfully resumed work with full safety protocols in place thus avoiding the incident.

Lower Your Risk Today with Chubb Risk Consulting

Our team of world-class industry professionals is readily available to partner with your business and effectively mitigate any risks you may face. Contact our team below to explore how we can help you manage risks more effectively.
