What We Have Paid Lately

- A developer and manufacturer of imaging equipment experienced a fire when a battery backup system overheated and ignited. The fire suppression system activated and extinguished the fire, containing it to a clean room. However, due to fire, smoke, and water damage, the clean room was deemed a total loss. The property loss included more than ten pieces of imaging equipment, numerous small tools, electronic testing equipment, parts, and furniture. Chubb's response included six months of lost business income while a new clean room was reconstructed. **The settlement was in excess of \$1M.**
- A large fire broke out on the first floor of an insured's processing facility in a plant located in South Korea. The fire spread rapidly causing the roof to collapse, resulting in a total loss. The local policy's property damage limits were exhausted and excluded business interruption coverage. Chubb's Excess policy included insurance for blanket building & personal property, personal property of others, stock, and business income/extra expense and responded on an Excess basis for both damage above the local policy limits and business interruption not covered by the local policy. **The settlement in excess of \$1M.**
- A FinTech firm provided a suite of fraud detection, analytics, and marketing software to a financial services client. A programming error by the FinTech company became evident once the software was deployed by their customer. A hacker exploited a vulnerability, which resulted in a breach. Chubb, leveraging its Cyber expertise, quickly assessed the fintech company's legal and contractual liabilities. **The settlement was in excess of \$1M.**
